

Please reject NAB petition 04-160. I should not have to listen to music and commercials I do not want to hear, just so I can hear weather and traffic reports on the radio. Regular commercial stations have almost nothing that I care to hear anymore. XM Satellite Radio plays only the music I want to listen to and now has useful traffic and weather information. I rarely listen to commercial broadcasters any more because they rarely have anything I want to hear. I would not buy another vehicle that did not have an XM satellite radio receiver.
